**Seasons Greetings.** An incredible year, politically and economically. Hopefully, the new administration can deal with and overcome some very difficult problems.

We're *still* trying to be a bit more retired these days. WhistleSoft, as a corporation, is now closed, but Dick keeps going into the Lab as a Guest Scientist. Two published papers this year. Still squashing, hiking, and skiing (62 days last season!). Traveling this year has been confined to Colorado and Arizona, which included the two 50<sup>th</sup> Anniversaries pictured above.
